

"Blend"

Verse 1

When you stand on golden sand, that is where I'll be.
When the waves break on your feet, think of me.
& The dew drops on the ground, when the morning sun shines through.
As they slowly fade away, I'll think of you.

Chorus

That's how we must blend, that's why we must blend.
One moment turning into the next and you can't tell where it began.
That's how we must blend, that's why we must blend.
So come on baby take hold of my hand, cause you know,
Love happens, when we blend.

Verse 2

As I hold you close to me, your pretty eyes are all I want to see.
I feel your heartbeat, and hear you breathe, anymore I just couldn't believe.
As I take your hand in mine, I feel the warmth of your skin.
And it all starts to sink in, this is real love that we are in.

Verse 3

I love to watch you while you sleep, it's the sweetest thing I've ever seen.
To know that this time tomorrow morning, I can be doing the same thing.
& All the times that we've gone through, how we grew in love and strength,
Like tiny butterflies in cocoons breaking free, you and me, fly away.

Chorus

Verse 4 (softly)

In my mind you're standing there, on the beach, between the waves.
But in my heart I felt the pain, things will never be the same.
As I take your hand in mine, I feel the coolness of your skin.
And it all starts sinking in, you are gone, but I'll see you again.

Chorus

Musical Interlude
